

Victoria hà raprisintatu una fusea incù un pavimentu triangularu.
Ogni pezzu hè un triangulu rettangulu isoscelu.

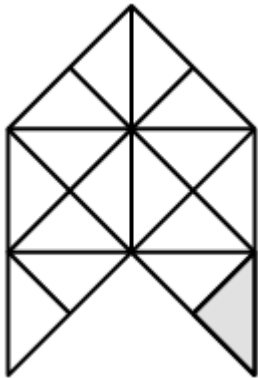

Quanti trianguli si pò vede in a so riprésentazione ?

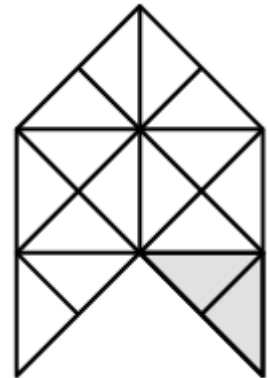

Éléments de réponse

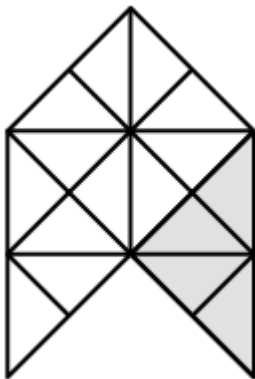

On voit **16** triangles constitués
constitués d'une tuile.

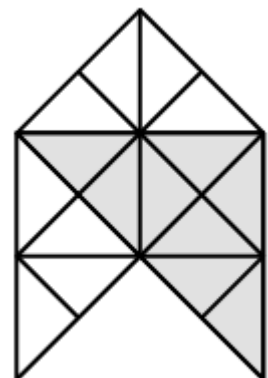

On voit **12** triangles
constitués de deux tuiles.

On voit **7** triangles constitués
de quatre tuiles.

On voit **2** triangles constitués
de huit tuiles.

$$16 + 12 + 7 + 2 = 37$$

Ce qui donne un total de **37 triangles**.
